## Acknowledgement

I have taken efforts in this project. However, it would not have been possible without the kind support and help of many individuals . I would like to extend my sincere thanks to all of them.

I am highly indebted to Aptech North Nazimabad for their guidance and constant supervision as well as for providing necessary information regarding the project & also for their support in completing the project.

I would like to express my gratitude towards my parents & member of Aptech North Nazimabad for their kind co-operation and encouragement which help me in completion of this project.

# 1. Introduction

NEXTAG is selling various types of Purse and Wallets. The company advertises by distributing the pamphlets, advertising on television and so on. Due to rapid development in internet field, the company decides to launch a website where people will get all the information about the various products available with them easily.

## **Requirement Specification:**

The Web site is to be created based on the following requirements.

- 1) The Home Page should be created with proper sections and with a suitable logo.
- 2) Home Page should contain details on Purse and Wallets with suitable images.
- 3) The site should display a menu which will contain the options for brief introduction about the various purse and wallets available, location of the shop and any other information if required.
- 4) The information should be categorized according to the brand names of the products like if a User wants to see only "LOUIS VUITTON" products or any other companies products then he/she can click on a Link/button/menu etc and can see only that Brand products.
- 5) When a user selects any particular brand, a list of products for that brand will be displayed
- 6) A brief summary of features of individual products should be displayed on the Web Page along with the product but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.
- 7) The user should also be able to compare the various products of different as well as similar brands.
- 8) There should be a "Contact Us" page which will have the Address of the Company which is as follows and the mail address which when clicked will invoke the local mail client from where they can send an email.

## 2.3 Interfaces

### 2.3.1 User Interfaces

The user interface for the software shall be compatible to any browser such as Internet Explorer

1. Mozilla
2. Netscape Navigator
